Objective

Third-year Computer Science Engineering student at E-JUST driven by a 'binary-first' approach to problem-solving. Dedicated to bridging the gap between modern frontend interfaces (React.js) and robust, enterprise-grade backend architectures (ASP.NET Core MVC). Actively leveraging full-stack development skills—including emerging proficiency in Node.js—to architect scalable, user-centric software solutions.

Skills

Languages: C# | JavaScript (ES6+) | Python | C++ | SQL
Backend Architecture: ASP.NET Core MVC | Node.js | Express.js | Django
Frontend Engineering: React.js | Tailwind CSS | Bootstrap | HTML5 / CSS3
Databases & ORM: MS SQL Server | MongoDB | Entity Framework | Relational Design
Developer Tools: Git | GitHub | Visual Studio | VS Code | Figma

Education

Enrollment

Egypt-Japan University of Science and Technology (E-JUST)
Bachelor of Computer Science Engineering (CSE)
Graduation Year: 2028
Cumulative GPA: 3.81

Kafr El-Sheikh STEM School
High School Graduate – Class of 2023
GPA: 3.8

PROFESSIONAL TRAINING

SEF Academy Aug 2025 – Present
Full-Stack Engineering Trainee

- **Frontend Architecture (Completed):** Engineered responsive, interactive web interfaces utilizing React.js, Three.js, Tailwind CSS, and Bootstrap.
- **Backend Architecture (Ongoing):** Architecting scalable server-side applications and RESTful APIs using Node.js.

Digital Egypt Pioneers Initiative (DEPI) – MCIT Aug 2025 – Jan 2026
Software Engineering Trainee & Ambassador

- **Core Technologies:** ASP.NET Core MVC, .NET Core Web API, C#, SQL Server, Docker, Unit Testing.

Egypt Makes Electronics (EME) Oct 2025 – Nov 2025
Artificial Intelligence Trainee

- **Focus Areas:** Applied Python for Machine Learning, Deep Learning, Computer Vision, and Data Preprocessing pipelines.

Projects

Recommendation Letters

Intelligent Academic At-Risk Predictor Feb 2026 – Present
Tech Stack: Python, Scikit-Learn, Pandas, Machine Learning Pipelines

- Architecting a machine learning classification system to analyze historical performance metrics and accurately predict academically at-risk students.
- Designing robust data preprocessing pipelines and evaluating classification algorithms to deliver actionable insights for academic intervention.

Morshed – Egypt Tourism Platform 2025
Tech Stack: ASP.NET Core MVC, SQL Server, Clean Architecture, Identity

- Integrated ASP.NET Core Identity for secure authentication and role-based authorization, featuring a comprehensive management dashboard.
- Engineered a responsive UI with a custom design system and dynamic content rendering, including smart image fallback and interactive maps.
- **GitHub Repository**

Aetheria Hospital Management System

2025

Tech Stack: Django, Python, SQL Server, HTML/CSS

- Engineered a full-stack healthcare platform to securely manage patient records, billing cycles, and administrative workflows.
- Developed a conflict-free appointment scheduling engine with custom validation logic to eliminate double-booking and data collisions.
- **GitHub Repository**

Bi-directional IoT Tracking System

2024

Tech Stack: IoT Sensors, Live Data Processing, Telemetry

- Developed a real-time hardware-software system utilizing motion sensors to monitor and track entry/exit data accurately within hall environments.
- Enabled two-way telemetry for remote access and live data synchronization between local sensors and cloud-based databases.

Enviro Diesel – STEM Research

2023

Award-Winning STEM Research & Process Engineering

- **Awards:** 1st Place & Gold Medal at EISTF; Top 10 Finalist globally in the UNICEF & iSpark Climate Challenge.
- Pioneered a sustainable process to produce biodiesel and glycerol from recycled waste oil and coffee grounds, replacing industrial inputs with circular materials.
- **Project Report**

Awards & Honors

- | | |
|---|------|
| – 1st Place & Gold Medal (National): Egypt Intl. Science & Tech Fair (EISTF) – Chem/Env | 2023 |
| – 2nd Place & Silver Medal (Republic): Bibliotheca Alexandrina Science & Eng. Fair (BASEF) | 2022 |
| – Bronze Medalist (Top 20% Nationally): Mathematical Kangaroo Competition | 2021 |
| – 6th Place Finalist (Republic): UNICEF Youth Challenge | 2022 |

Extracurricular Activities

- | | |
|---|-------------|
| – Mechamatics Club: Head of Writing Committee. Led content strategy and technical workshops. | 2022 – 2023 |
| – IQ Supplies: Founder & Lecturer. Established STEM educational initiative and curriculum. | 2021 – 2022 |
| – KFS Mathematics Club: Vice Head of Content Writing & Head of Marketing. | 2021 |
| – STEM Physics Club: Head of Social Media & Academic Writing Trainer. | 2022 |
